Independent Final Quality Control for brands producing in Portugal

Real Independence

Approval with photos + live dashboard

Who We Are

Pack & Polish is your trusted partner for rigorous and independent textile quality control. Headquartered in **Barcelos, Portugal**, we are strategically positioned at the heart of the textile industry.

- **Total Independence**

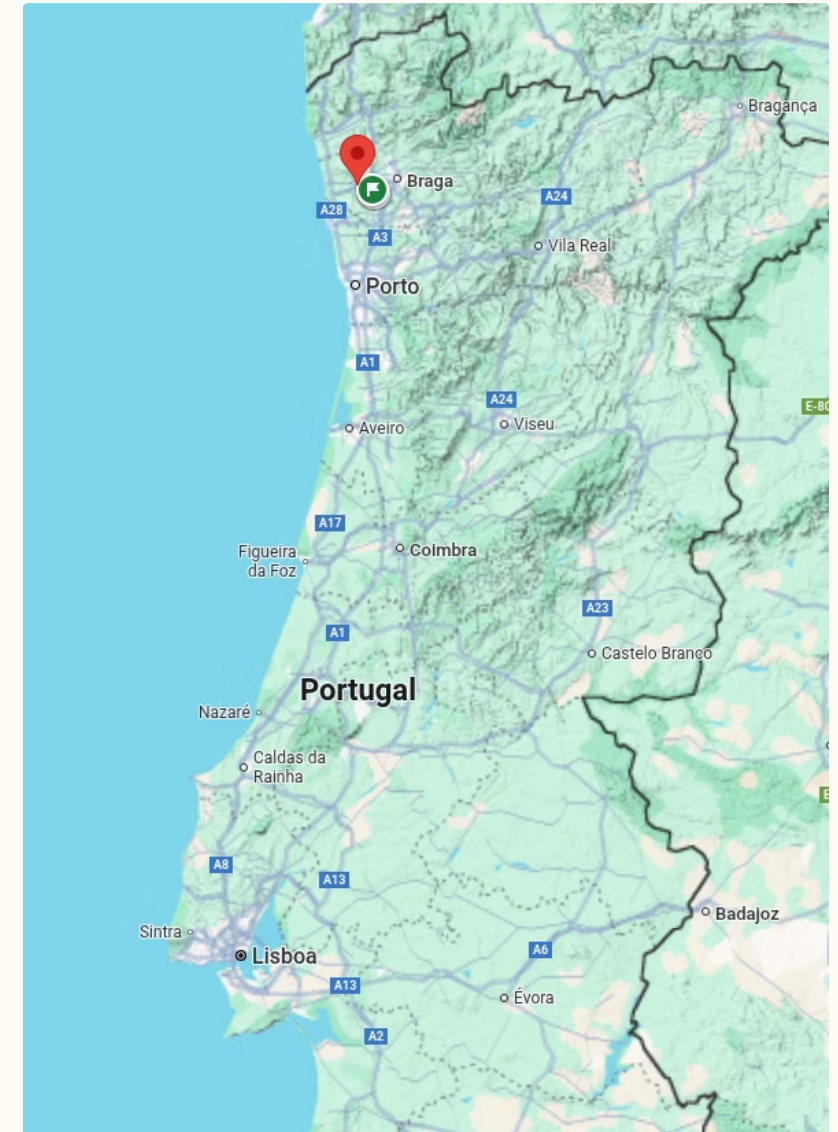

Brand partner — never the factory's.

- **Speed and Efficiency**

Agile approval and dispatch process, optimizing your value chain.

- **Complete Visual Evidence**

Detailed reports with photos and live dashboards for transparency and monitoring.

The Pack & Polish Process: Optimized Quality

See how Pack & Polish revolutionizes quality control, transforming a process prone to surprises into an optimized and transparent workflow.

Before: Traditional Control

With Pack & Polish: Optimized QC

The Pack & Polish Process: Optimized Quality

Pack & Polish transforms textile quality control in Portugal, offering an independent and transparent solution that ensures the excellence of your production.

Detailed Visual Reports

Piece-by-piece approval with high-resolution photos, ensuring that each item meets your quality standards.

photo per piece + ID + status

Live Tracking Dashboard

Monitor the progress of inspections in real-time through an intuitive and transparent dashboard, wherever you are.

approve/reject remotely

Effective Remote Approval

Expedite the shipping process with fast and secure remote approvals, optimizing your value chain.

decisions in minutes

Interactive Dashboard: Total Visibility

Centralize and visualize all quality control data through our intuitive, real-time dashboard. Get immediate access to the most important metrics for your decision-making.

Quick Decision

Approve or reject pieces with a click, streamlining the workflow and ensuring that only what meets your standards is shipped.

Approval Rate

Monitor the percentage of approved pieces in each batch, providing a clear overview of production performance.

Defect Analysis

Identify the most common defects through a detailed ranking, enabling focused corrective actions and continuous improvement.

Batches (Progress and Quality by PO)

Centralize and visualize the progress and quality of each Production Order (PO) through an intuitive interface, designed to mirror our real-time dashboard.

% Inspected by PO/Style

Visually track the inspection progress of each batch and style, with clear progress bars for each PO.

Real-time Defect Rate

Instantly monitor the defect rate in each batch, with status badges indicating the current quality status (Approved, In Progress, Pending).

Complete Details

Click "View Details" to access complete reports and history for each batch, ensuring full transparency.

You can see where you stand on each PO and where to act first to ensure total quality, with visual indicators that reflect the most relevant information.

Analytics: 7 Days and Trends

Beyond daily data, visualize trends to optimize defect reduction and accelerate the process.

Defect Rate

Monitor the trend of the defect rate to identify areas for improvement and prevent future occurrences.

Average Approval Time

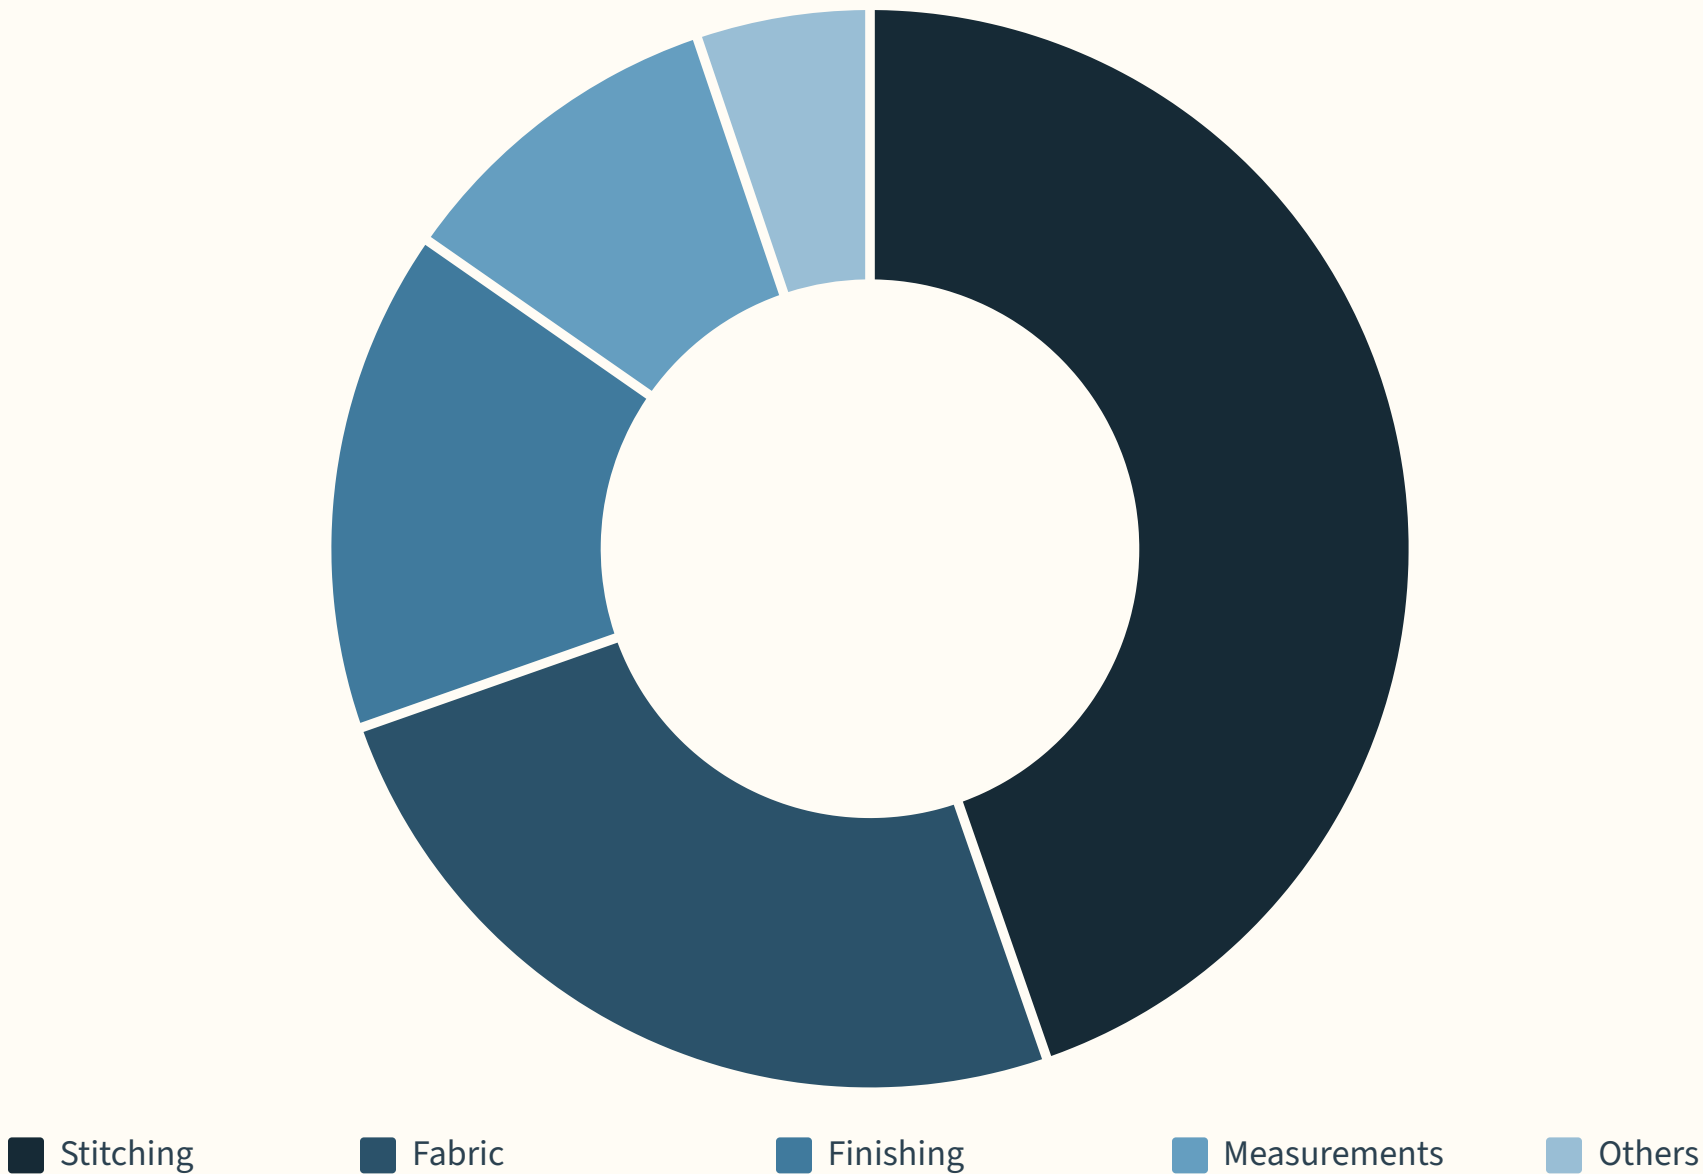

Monitor the efficiency of the approval process, aiming to reduce the cycle and expedite dispatch.

Productivity (Throughput)

Analyze production volume per period and supplier to optimize workflow and resource allocation.

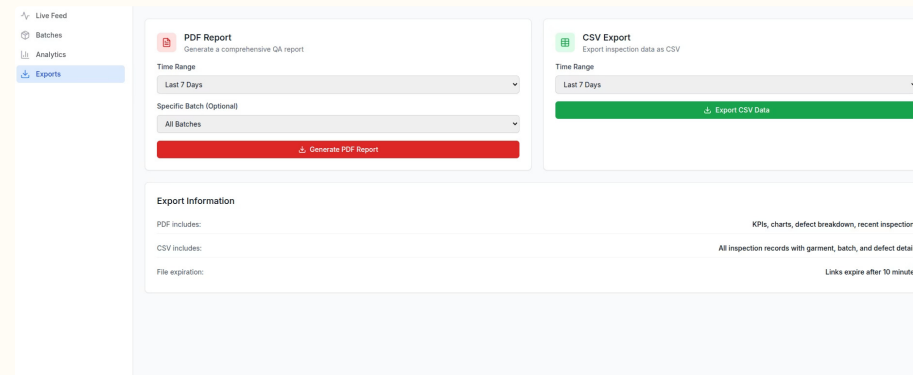

Identified Defect Types

With this data, you can see where to act to reduce defects and gain speed in the process.

Exports (PDF/CSV in 1 click)

- **PDF with KPIs + charts + defect breakdown and latest inspections.**
- **CSV with all records (item, batch, defect) — ready for BI.**
- **Links expire (10 min) → security & compliance.**

Pack & Polish Inspection Bench

We are your brand's eyes in Portugal.

Our inspection bench is engineered with technical precision to ensure maximum accuracy and independence in quality control, differentiating us from standard factory AQL inspections.

D65 Light/CRI $\geq$ 95

Ensures an ideal lighting standard for precise color perception.

N5–N7 Gray Surface

Ensures a neutral background, eliminating visual distortions for a quality inspection.

Top-Down Camera (Photo per Piece)

Allows for high-resolution image capture of each piece, ensuring detailed visual evidence.

QR Scan → Dashboard

Streamlines the process of registration and data integration into the interactive dashboard, with full traceability.

This technical rigor embodies our independence and professionalism, addressing objections about being "the same as factory AQL".

Access Your Dashboard

Explore our interactive dashboard with a **sneak peek** of fictional data. Access credentials are:

- admin@example / demo1234

Access Dashboard

If you are unable to access the dashboard, please visit packpolish.com

Visual Approval with Photos

At Pack & Polish, transparency and precision are fundamental. Our visual approval process offers unprecedented clarity, ensuring **complete evidence and traceability** for each piece.

Detailed and Interactive Reports

Each report is a visual dashboard, presenting high-resolution thumbnails of each piece, accompanied by its unique ID and respective status (approved/defective). This visual approach allows you to:

- Confirm the quality of each item remotely, with total confidence.
- Quickly and accurately identify any non-conformities.
- Maintain a permanent, easily auditable visual record at any time.

This system creates an **auditable and shareable history**, providing complete control and confidence in your product's quality.

A detailed report example will be presented and included in the pilot phase.

Advantages for Brands

Reduced Returns

We eliminate operational costs associated with defective returns and protect your brand's reputation.

Consistency Across Suppliers

Standardized inspection for all manufacturers, ensuring uniformity regardless of the factory of origin.

Dedicated Local Team

Fast communication without language barriers, with professionals specialized in international standards.

Total Transparency

Access to an intuitive dashboard with traceability and visual evidence of each inspected piece.

How the Pilot Works

Free Trial

We start with 1 style or a small production run, with no cost or commitment for your brand.

Dashboard Access

We provide exclusive access to the digital platform where you can monitor the entire process in real-time.

Detailed Visual Report

We deliver a comprehensive report with a piece-by-piece evaluation and photographic documentation of each stage.

Next Steps

Ready to get started?

Choose your preferred path:

Schedule a Meeting

Let's discuss your brand's specific challenges and how we can help.

Start a Free Pilot

Experience the service with a small production, without any commitment.
